SUMMARY

Backend-focused software developer with 2+ years building a production multi-tenant fintech SaaS platform serving 5 broker. Designed and delivered 6 Go microservices end-to-end — from system design through deployment — across a distributed stack spanning Apache Kafka, MongoDB, Apache Doris, and QuestDB. Comfortable with Agile/Scrum methodology.

EXPERIENCE

COS Great Trading

Jun 2024 – Present

Backend Developer (Full-Stack) · Kuala Lumpur, Malaysia

- Designed and built 6 Go microservices from scratch covering KYC verification, leads management, case management, gamification, questionnaire forms, and centralised logging.
- Engineered a pipeline for financial reporting system: a scheduled batch repopulation service and a real-time Kafka consumer processing. Designed idempotent deduplication logic.
- Implemented real-time lead update delivery to the frontend using Server-Sent Events (SSE) and Kafka event propagation across multiple consumer services.
- Owned the multi-tenant deployment pipeline: compiled Go binaries locally, scripted rollout via shell + WinSCP with versioned backup and post-deploy health checks across all brands.
- Maintained Postman collections as the API contract documentation for frontend developer integration.
- Built and maintained frontend features in React 19 / TypeScript.
- Worked across a polyglot stack: Go (primary), TypeScript / React depending on service requirements.
- Implementing Agile/Scrum methodology, having daily standup meeting with team leads for updates and planning.

PROJECTS

Renotech – https://renotech.space/

2025 Dec – Present

Independent SaaS platform for renovation contractors in Malaysia.

- Built full-stack application with Next.js (App Router); deployed to Vercel.
- Configured Cloudflare DNS and Cloudflare R2 for object storage
- Main tech stack is Next JS for project structure, Mongo DB for database storage

SKILLS

Languages
Go (primary), TypeScript, C# / .NET
Backend
Golang Gin, JavaScript, C# / .NET
Databases
MongoDB, QuestDB, Apache Doris (SQL)
Messaging
Apache Kafka
Frontend
React 19, Next.js, Vite, TypeScript, Tailwind CSS, shadcn/ui, Ant Design
Infrastructure
Nginx, Cloudflare (DNS, Tunnel, R2), Vercel, Linux (Ubuntu), WinSCP
Tools
Lark, Slack, Atlassin, Git, Postman, Bit Bucket, Source Tree, Firebase, SendGrid

EDUCATION

Bachelor of e-Business Technology & Management

Graduated 2024

Malaysia · YPC International college in corporate with Liverpool John Moores University (LJMU) UK
